Rear gardens of Liverpool Road South																1				Including boxing day 2015	Ground water frequent long lasting problem								
																		1	1	1	1	1	1	1	1	Yes		*The external floods are a low approximation (some years may have no floods and other years will have more than 1). The householder believes that they flood externally at least annually on average but can't remember the exact dates	Ground water frequent long lasting problem. since 2012 50% of the garden gets covered with water for up to four weeks. Front garden of same house also floods from UUs A59 sewers see following
																										Yes	Rang WLBC in late 2012 who said contact UU. UU said they couldn't do anything as their responsibility ended at the road at the front gate. They said try LCC	Including boxing day 2015	Ground water frequent long lasting problem Photos are from 2012, the flooding has happened on a number of occasions and last for several months. Records for 2014 aren't definite. Another neighbour has supplied additional photographs and information as follows. My neighbour's garden floods so badly that the sun chairs were often floating on top of the water
																		1	1	1	1	1	1	1	1	Yes		Including boxing day 2015 *The external floods are a low approximation based on the information supplied	Ground water frequent long lasting problem Photos are from 2012, the flooding has happened on a number of occasions and last for several months. For instance, the end of my garden was under water from Boxing Day 2015 until late February 2016. Records for 2014 aren't definite. A neighbour has supplied additional photographs and information as follows. My neighbour's garden is permanently flooded for 2/3 months per year
Mescar Lane								1																	Yes	UU	Boxing day 2015 This flood actually started Christmas day. UU came out and identified the cause as a rising water table due to the water on the field behind	Ground water Christmas day 25/12/2015 persisting for several days	
Richmond Park (Field)																									No		Oct 2015 through February 2016	As the BFG. group are probably aware, Richmond Park is susceptible to some sort of flooding most winter's. Encouraged by a grant from Mr.Steve Kent, from WLBC parks and gardens department and a top up from Burscough Richmond Football Club via an FA grant of £15,000, new drainage was installed under and around the park including the football pitch area. Unfortunately last winter, as we all know was particularly bad, culminating in the football team not playing games on the pitch from around the last week's of October till the end of February. Up to now this season we've been lucky with only one game called off. This led me to thinking , why did we bother with the drainage under the park, surely getting things sorted further along the drainage system would have been a more sensible idea. As it is, the money to the tune of £ 40,000 at this moment in time has been a waste of time ? The area from Richmond park, Junction lane right down to the old mill in Mill lane are a problem flooding area's, as we all know now from last winter	
Daisy Lane																									No		Boxing Day 2015 Daisy Lane/Meadow Lane/ railway junction flooded	Surface water Railway crossing flooded	
Burscough Community Farm Meadow Lane																									Yes		Boxing day 2015 8-acre field was submerged in over 5' feet of water from the Eller Brook, resulting in the loss of 32 chickens & ducks, beehives & crops	Surface water Devastating deep flood on boxing day 2015	

Locality	Internal Flooding										External Flooding						Photo	Which body was informed	Notes/Subsequent actions	Notes	
	2004	2008	2010	2011	2012	2013	2014	2015	2016	2008	2010	2011	2012	2013	2014	2015					2016
Crabtree Lane (High Risk WLBC)					1			1				1	1	1	1	1	1	Yes	WLBC Lancashire County Council. Network Rail, LCC Highways Dept	Including boxing day 2015 Resident told that when funds are available an investigation will be carried out. <i>*The external floods are a low approximation (some years may have no floods and other years will have more than 1). The householder believes that they flood externally at least annually on average but can't remember the exact dates</i>	Surface water Bernie Webster (BFG) had at least one recent high external flood. The date of the external flood is unknown so estimated as 2014? WLBC report owner, Mr Webster concerned about the capacity of the culvert running under the railway running south to north to the west of his property. However, after a very short open section this runs into a much smaller culvert under the farmers field. EA surveyor took a level on a step (9.77m) which Mr Webster said was the height of the floodwater
					5			5					1		1	1		No	WLBC	Including boxing day 2015	Surface water These are 5 houses also known to have suffered flooding at the same time to a similar level as Bernie's above. The date of the external flood is unknown so estimated as 2014?
					1			1					1		1	1		Yes	Lancashire County Council Network Rail, LCC Highways Dept	Including boxing day 2015	Surface water
																1		Yes		Boxing day 2015	Surface water The water came off the fields with nowhere to drain to as all the drains were full. Our septic tank could not drain away with very unpleasant consequences. We have still got an elderly couple staying with us at our property, who are still having repair works done to their cottage, and will be at least another 6 weeks before they can return home
								2								2		Yes		Including boxing day 2015	Surface water Lasted for over a week no interest from agencies contacted thought be due to lack of culvert capacity
																1		Yes		Including boxing day 2015	Surface water this was the view from our front door step between Christmas and New Year Crabtree Lane When we contacted the council no one was interested in doing anything nor about closing the road to traffic which made matters worse with motorists speeding
								5								5			WLBC because they successfully got a grant from them	Including boxing day 2015	Surface water WLBC didn't keep the records of the many unsuccessful flood relief applicants nor will they give us the records of any flood victims aside from the Boxing Day 2015 ones
																	1		Fluvial - Ordinary watercourse	22/06/2016	Surface water FOI request on WLBC
Low Meadows Farmland (near Moss Lane)																1	No	Attended BPC Meeting August 2016	Including boxing day 2015	Surface water flooding My wife & I stayed on to listen to the debate on flooding issues. Where we live on Moss Lane in between Burscough & Rufford we have not been directly involved with flooding problems. Nevertheless, we have seen from our back bedroom window the devastation caused on Low Meadows some 400 metres across the railway line & canal from us. We were appalled at the way the DOE and other organisations appear to be trying to distance themselves from the problem & the way they are dismissing the value of keeping the various pumping stations going. I don't know just what the annual maintenance bill for these pumping stations is but perhaps there is another way of financing their upkeep.	
Moss Lane				1			1				1				1		Yes	Insurance company's investigators are having an independent report prepared	Including boxing day 2015	Surface water	
							1								1			Afraid to report in case house becomes uninsurable	Boxing day 2015 Water sheds off the A59 and into my home/garden. 														1	1	1	1	1	1			*The external road floods are a low approximation based on the information supplied	Suspected surface water flooding Front of property and road has flooded on and off for the 20 years he's lived here. Road is at a natural low point and water can't drain away. Says it DOES drain, slowly. Showed me outside on the road where there used to be 2 gulleys side by side, but the council filled one/tarmaced over it. There is another gully opposite, but that's it. Stated that in times of flood, water has been pumped towards them from Truscot/Higgins Lane, so it's inevitable their flooding is worse than it would have been. Showed me a property opposite where 'they' have had cameras down the drains. Said there is suspected to be some kind of collapse or blockage under the 'branch-line' where furnival Drive splits off to feed about 10 houses, and traffic bollards etc have been fished out before now.
																						has lived there since 1952. No flooding back then, but the properties then were tin huts wher the Navy (!) lived. Says there used to be a stream and ditches leading around where the houses now are, and off over towards the canal, but were filled in many years ago. 1971 was the first time it flooded. 1983/4 the whole estate flooded badly. Thios house flooded up to the 2nd step of the stairs, and there is already a tall step to go into the house. So, probably 2.5 ft? House would have flooded on other occasions also, but they put sandbags in front of the door. This man has worked for the council and also the Water board and has an excellent memory. Says the water comes off Yew Tree Farm, and will be made much worse by development there. Says UU need to spend a LOT of money, and until they do, the problems will only get worse.	
Hesketh Road																1		No		Boxing day 2015	Suspected UU sewer surcharge		
							1									1		Yes	First occurred in the 1980s	Including boxing day 2015 Frequent	UU Sewer surcharging

Warpers Moss Lane															1	1	Yes	26/12/2016	Front and side gardens flooded in Boxing Day. Front garden also in June. Has had to put boarding up on gate to act against waves created by cars. Flooded several times since the '80's. Has had to fill in ventilation blocks at side of house to stop water getting in under the house. Water has got in through vent bricks at the front of house before now. Road floods if rains for more than 2 hours constantly. A lot of water flows down the road downhill from the A59 due to blocked gulleys. He reports regularly to WLBC. No action taken by them most of the time. The road outside these houses is in a slight dip, so water stops there. Problem is blocked gulleys	Suspected UU sewer surcharging	
															1			26/12/2015	Boxing Day- flooded half way up drive. "wet the garage floor" on 26/12/15 but no damage to property Not as bad in June. Cars make waves that make problem worse.		
																1	1		Frequent occurrence	Including boxing day 2015	Suspected UU sewer surcharging Hi Further to your leaflet in The Champion we can confirm that Warpens Moss Lane at the junction with Weaver Avenue has been flooded on several occasions over the last few years. Most recently Boxing Day 2015 when it was at its worst with water lying from the junction with Warpens Moss Close right up to just past the public footpath. This incident was the worst we've experienced in a long time with the water coming right up to our front door and completely covering the pavements so as to be unable to distinguish the road from the pavement. The last time Warpens Moss Lane was flooded albeit for just a few hours was Saturday 11th June 2016 after a torrential downpour. Hope this is of assistance to your cause.
																	1		22/11/2016		Just to confirm that Warpens Moss Lane was flooded on the left hand bend travelling from Burscough on Tuesday 22 November 2016. The water was half way across the road and looked like it had been further across.

Truscott Road															1				Boxing day 2015	UU surface water sewer	
Higgins Lane/Truscott Road Junction															1		Yes	Frequent occurrence	Boxing day 2015	UU surface water sewer surcharging under Higgins Lane	
A59 Liverpool Road South													1			1	2	Yes		Including boxing day 2015 Frequent flooding to road and front garden only some of the examples of severe flooding have been counted 2012, 26/12/15, 11/06/16, 13/09/16 Also see A59 rear garden flooding from	UU sewer surcharging A59 Flooding Over the 29 years I have seen regular flooding on the A59 road directly outside my house each time we have heavy rain, the drains don't seem to cope with the problem even though they seem to be drain cleaners working on them. I have seen a number of people get drenched from spray when vehicles pass through deep rainwater/sewage lying on the road. It is not safe for pedestrians to be walking in this area when it rains and floods. The drivers fail to slow down and by travelling at speed also have the potential to cause accidents. I have vivid recollections that on 26 December 2015 and 11 June 20016 that the water lying on both sides of the road nearly met in the middle, only the ridge in the middle prevented this
												1				1	1	Yes		Including boxing day 2015	UU sewer surcharging June 2016 Flooded drive and garden
									1								1	Yes	Frequent occurrence	Jun-16	UU sewer surcharging June 2016 Flooded drive and garden and house
																	1	Yes	Manor Road sewer surcharging talked about at BPC meeting as a frequent occurrence	Aug-16	UU Sewer surcharging Late at night on the 28th August flood caused by 20 minutes of very heavy rain which drained away after approximately 20 minutes

Locality	Internal Flooding										External Flooding						Photo	Which body was informed	Notes/Subsequent actions	Notes		
	2004	2008	2010	2011	2012	2013	2014	2015	2016	2008	2010	2011	2012	2013	2014	2015					2016	
																2			We were flooded on boxing day 2015 at the front and back of the house. We just avoided the water coming into the house with pumps but our garage was completely flooded. We have since had a new drive with an eco drain put in. Heavy rainfall was the cause.	Including boxing day 2015 and neighbour had the same problem	Suspected UU sewer surcharging	
School Lane							1									1		Yes	Frequent occurrence	Including boxing day 2015	UU sewer surcharging Have witnessed sewer near the School flow down the street under the bridge	
School Lane																1		Yes	Frequent occurrence	June 11th 2016	Suspected UU sewer surcharging LCC drain under bridge probably also blocked (maybe with sewage)	
Higgins Lane/ Industrial Estate														1		1		Yes	Frequent occurrence	Including boxing day 2015	Suspected UU sewer surcharging	
Higgins Lane/ Truscott Road House							1							1		1		Yes	Frequent occurrence	Including boxing day 2015	UU sewer surcharging In 2015 witnessed UU surface water sewer surcharging flooding road and house on Truscott Road	
Higgins Lane /Burscough Industrial																	1		1100 hrs Wednesday 29 June 2016. Junction off Higgins Lane onto Burscough Industrial Estate		Suspected UU sewer surcharging	
Square Lane																1		Yes	Frequent occurrence	Including boxing day 2015	Suspected UU sewer surcharging	
Gower Gardens (High Risk WLBC)							3									3			Recorded by WLBC because they successfully got a £500 grant from them (a list of the unsuccessful residents wasn't supplied)	Including boxing day 2015	Suspected sewer surcharging Flooding of homes, gardens and road Received £500 payment from WLBC FOI request on WLBC	
							1									3	9	Yes	UU	Including boxing day 2015 External flooding, garage flooding and backed up toilets. One properties toilet overflowed on Dec 26 2016. Flooding in this area was unknown before 2015. Except for a flood around 1986 which either suggests that, the system worked 30 years ago (30 year return) and is now failing 3 times a year! or the system still works and we have had three 30 year storms in less than 12 months	UU combined sewer surcharging Flooding of home, gardens and road This is an example of peoples reluctance to report flooding because one resident was unaware that at least two of her neighbours in a small close had been internally flooded (we know this because they received a grant from WLBC)	
								1	1								1	2		UU	Flooded boxing day 2015, then June 2016 and 22nd August 2016	House flooded from toilet bowl 2015, in June 2016 he wasn't flooded in the house because the inspection cover blew off and flooded his drive and garage damaging his motorbikes and machine tools, in August 2016 he wasn't internally flooded because he pumped out the inspection spave into his garden. UU paid him for the pump and other materials. Steve Mogfrord wrote to him in September 2016 and told him the flooding was caused by HI of the sewer network (a copy of the letter is held by BFG).
									1											WLBC passed information to LLFA - resident has advised UU	17/06/2016	Sewer surcharging FOI request on WLBC

	2004	2008	2010	2011	2012	2013	2014	2015	2016	2008	2010	2011	2012	2013	2014	2015	2016					
Manor Crescent								1			1	1	1	1	1	1	1		LCC, UU, WLBC,	Almost continuous sewer flooding problems since 1999	<p>Sewer flooding</p> <p>In respect of flooding in Burscough, up the access road to Liverpool Road South, Burscough, Lancs L40 7TB, in this access road which is private property is a round manhole, it is not on my property but when it overflows it runs down my property and floods the rear patio and cellar the drain has blocked on numerous occasions, when this happens I set off a circle of denial that runs through, West Lancs Council, Lancashire County Council, United Utilities, Building Control, and Environmental Health, (I have even tried Burscough Parish Council) everyone denies responsibility and blaming one of the other agencies, this last flooding incident has been going on since June, 2015, and still no one will accept responsibility, even when some one eventually clears the blockage they never address the root cause. <i>*The external floods are a low approximation (some years may have no floods and other years will have more than 1). The householder believes that they flood externally at least annually on average but can't remember the exact dates</i></p>	
Briars Lane Lathom																1		Yes	Frequent occurrence	Including boxing day 2015	<p>Surface water flooding (and suspected sewer surcharging and gulley blocked)</p> <p>Deep flood in road between Heathfields and Ellerbrook making it impassable. Water seen flowing downhill from a road manhole near the Heathfields estate, water was also seen flowing from a field through garden gates onto the road. Drain to Ellerbrook blocked/collapsed</p>	
																1		Yes	First occurrence	Boxing day 2015	<p>Surface water</p> <p>Drive flooded with 4" water</p> <p>Householder said the road drainage couldn't cope</p> <p>Flooding all around house near Briars Hall</p>	
								1												WLBC because they successfully got a £500 grant from them	Boxing day 2015	<p>Location on Briars Lane unknown</p> <p>Received £500 payment from WLBC</p> <p>FOI request on WLBC</p>
Briars Brook Lathom							1												WLBC because they successfully got a £500 grant from them	Boxing day 2015	<p>Location on Briars Brook unknown</p> <p>Received £500 payment from WLBC</p> <p>FOI request on WLBC</p>	
							1												WLBC because they successfully got a £500 grant from them and applied for £5000 grant	Boxing day 2015	<p>Location on Briars Brook unknown</p> <p>Received £500 payment from WLBC</p> <p>FOI request on WLBC</p>	
Mill Dam Lane																1			Garden 1' deep in water	Writer said July but road closures and widespread flooding (everywhere) meant it was 11th June 2016	<p>Suspected sewer flooding</p> <p>likely to be related to the long running Manor Road problems</p>

THE NUMBER OF FLOODS IN BURSCOUGH A COMPARISON OF THE DIFFERENT REGISTERS Rev 7A (23/11/16)																																						
UU Register (1)	FOC			0	0	1	2	0	N/A			3	4	6	5	7	8	N/A	Note 1: Info from 2010 to pre December 2015 flooding due to UU sewer flooding. FOC = Flooding Other Causes, HI = Hydraulically Inadequate																			
	HI			0	0	0	0	0	N/A			8	0	1	1	1	6	N/A																				
LCC Register (2)									32									N/A	Note 2: LCC Section 19 report for internal floods boxing day 2015 only. It specifically excludes groundwater from consideration and ignores sewer floods onto roads and farmland from UUs network																			
BFG Register (3)	16	1	1	2	8	2	3	73	5	11	23	18	31	19	26	106	51	Note 3: BFG and residents input, plus input through dialogue with agencies and FOI requests on WLBC. LCC are currently blocking BFGs FOI requests for flooding information. Green highlight indicates possible double counting and are included so that the maximum error may be calculated. The percentages of sewer, surface and groundwater flooding were calculated based on the revision 6 issue of this document and are not updated at every issue so are now onwards approximations																				
	Sewer %	100		100	50	13	100	100	52	100	13	70	50	62	60	50	67		81																			
Surface water %		100		50	87			32		51	15	21	23	20	23	27	13																					
Ground water %								9		39	15	29	15	20	27	6	6
